It's based on a program which was originally written for the Cassini probe to test its data capture systems. You can see the Solar System evolve until it becomes part of the Milky Way Galaxy. The simulation stops in the middle of the evolution and goes through a sense of the universe containing the Solar System, the Galactic Centre and the

nfsEvolution brings the latest developments in the field of artificial intelligence and cutting edge technology to life in an animated and abstract style. A strict and modest screensaver with a sense of humor that's placed on a black background. nfsEvolution displays animations that change based on two key values, which are called Friendliness and Cruelty. These values are updated on a minute-by-minute basis by means of a recurrent neural network, which is particularly interesting because it can learn as it goes. This frees the artist from a one-sided work of imagination. Authorize Installation: Please right-click on the file and select "Run as administrator". Then, choose Authorize.
